Disability Day Celebrations at Residential Centres

The virtual disability event was held at all of their centres.

Arts Based Training Workshop
The faculty at SCARF attended a 5-day hybrid workshop on arts-based interventions, delivered by Mr. Patik for a training of arts and movement therapists. The lessons of the workshop will help integrate arts activity support and cultural and psychological services offered at SCARF for the benefit of our patients.

Disability Certification Camp at SCARF
SCARF organised a camp for certification of disability for persons with mental illness and intellectual disability. 200 participants, including residents of the residential centres were present and gave disable certificates. Based on their request of the participants they were registered with their respective District Disability Welfare Officers for the process of getting UD Card.

Physical Activity Based Interventions in Psychosocial Rehabilitation team of SCARF

Disability Day celebrations were held at all centres of SCARF.

Based on their request of the participants they were registered with their respective District Disability Welfare Officers for the process of getting UD Card.

The participants were very happy for the efforts taken to help their rehabilitation and for giving efforts for others.

The camp was conducted with the cooperation of the Department of Health.

The programme was very interesting and enjoyable. A useful workshop was conducted for the caregivers for persons with mental illness. This entire program was put together by the members of EAHV.

Peer Support
We support persons with serious mental illness in getting a lot of attention in recent times.

SCARF has a well-organized team working together in a structured peer support program. We will keep abreast of the reports in the coming months.
